

Creating table

```
CREATE TABLE Bank (  
    cust_id INT PRIMARY KEY,  
    cust_name VARCHAR(50),  
    bank_balance DECIMAL(10,2),  
    active_status VARCHAR(10)  
);
```

Inserting Data to it

```
INSERT INTO Bank  
VALUES  
(101,'Sugan',1000,'Active'),  
(102,'Arun',400,'Active'),  
(103,'Priya',0,'Active'),  
(104,'Kavin',250,'Active'),  
(105,'Divya',5000,'Active'),  
(106,'Rahul',0,'Active');
```

Output:

	cust_id	cust_name	bank_balance	active_status
▶	101	Sugan	1000.00	Active
	102	Arun	400.00	Active
	103	Priya	0.00	Active
	104	Kavin	250.00	Active
	105	Divya	5000.00	Active
	106	Rahul	0.00	Active
*	NULL	NULL	NULL	NULL

Update:

UPDATE Bank

SET active_status = 'Inactive'

WHERE bank_balance < 500;

Output:

Result Grid				
Filter Rows:				
Edit: 				
	cust_id	cust_name	bank_balance	active_status
▶	101	Sugan	1000.00	Active
	102	Arun	400.00	Inactive
	103	Priya	0.00	Inactive
	104	Kavin	250.00	Inactive
	105	Divya	5000.00	Active
	106	Rahul	0.00	Inactive
*	NULL	NULL	NULL	NULL

Delete:

DELETE FROM Bank

WHERE bank_balance = 0

AND active_status = 'Inactive';

Output:
